

5. PowerPoint Slides (about 10 slides) PowerPoint Slides should include the following

a. Main sections of your Game Design Document and how to play your game?

b. The main Greenfoot code for core mechanic(s) of the game

c. The main contribution of each team member for the project.

d. What challenges have you faced in developing your video game?

e. What are the possible future enhancements for your game?

f. References (media files sources)

Game Overview / Concept

Stay or Stray

- 2D top down game
- Story-driven experience focused on choices and emotions
- Player explores a house to take care of a dog and solve the mystery behind his existence
- The ending changes depending on the player's decisions
- Inspired by games like Undertale and Super Granny

Target Audience

- Teen and casual players
- Players who enjoy exploration, puzzles, and narrative games
- People interested in emotional stories and moral choices

How to Play the Game

Objective

Explore the apartment house and bring Atlas to the park

Controls

- **W / A / S / D** ;Move
- **E** ;Interact with objects and characters
- **left and right arrow**; Continue dialogue, go back
- **Q**; quit dialogue

Main Gameplay Mechanics

- Exploration
- Collecting objects (money, key)
- Dialogue interactions
- Choice-based endings

Unique Feature

The game remembers previous playthroughs:

- Dialogue changes after replaying
- The protagonist becomes more aware of the story
- Different endings depending on player choices

The main Greenfoot code for core mechanic(s) of the game

(show in project)

Controls

- **W / A / S / D** ;Move
- **E** ;Interact with objects
- **left and right arrow**; Continue dialogue, go back
- **Q**: quit dialogue

What challenges have you faced in developing your video game?

Collisions: There's a lot of objects.

Finding compatible assets: (kitchen story)

Managing bugs: (didn't think long-term)

Last minute change: The level designs/dialogue changes a lot

Dialogues: Have to keep track somewhere

What are the possible future enhancements for your game?

- Scaling images to world: (so characters dont look too big)
- Adding music :(super important, prioritized tha world design due to lack of time)
- Adding image of the character next to dialogue boxes
- Worlds walling details.
- Bug fixing (stuck in wall)
